Corporate Performance  
Management for Construction

## PERFORMANCE + PROFIT VISIBILITY for CONSTRUCTION

Discover how Anterra's Corporate Performance Management (CPM) Platform can transform your Construction ERP data into actionable insights, improved project outcomes, and predictable profitability.

Anterra's CPM platform converts your financial data into **construction dimensions** that your ERP isn't built to provide.

Anterra Technology applies the CPM processes and methodology as defined by Gartner, to the unique needs of the construction sector, by creating a **suite of analytical applications** that draws data from the ERP system of record.

Construction finance professionals can **unlock hidden insights, manage massive datasets with unprecedented speed**, and make better-informed, strategic decisions.

Simply put, Anterra's CPM platform converts your ERP's **accounting data into construction-specific Key Performance Indicators (KPIs)**.

## CORPORATE PERFORMANCE MANAGEMENT PLATFORM

### TIME

- S-Curve Forecasting
- Pre-built Dashboards
- Backlog Reporting

### PROCESS

- Automated WIP Reporting
- Job/Cash Flow Forecasting
- Service Management

### PROFIT

- AR Collections
- Consolidated Financials
- Gross Margin Visibility

### The Secret Sauce in CPM? Data Engineering!

Corporate Performance Management (CPM) and Data Engineering are two critical components that work hand-in-hand to drive business success, especially in a data-intensive industry like construction.

**Anterra Data Center (ADC)** collects and stores financial data, while the **Anterra CPM Platform** converts that data into visualized business intelligence.

### COLLECTION

By aggregating data from ERP systems and project management tools, ADC becomes a unified data repository ready for analysis.

### DATA ENGINEERING

Once the data is collected, data engineering techniques are applied to structure the data. This step is crucial for maintaining the integrity and accuracy of the data, which directly impacts the quality of CPM outcomes.

### REPORTING

By providing a clear picture of the current performance and predictive forecasts, Anterra enables companies to make informed strategic decisions that align with their financial goals.

### ANALYSIS

With a solid data foundation, Anterra's CPM platform performs advanced analytics. It translates raw data into meaningful metrics and KPIs that reflect the financial health and performance of your construction projects.
