

SUPERCHARGE YOUR SAGE 300 CRE

WITH ANTERRA ADC + ABI

Empower your financial team with advanced data analysis to dive deeper into your operations and financials.

Discover capabilities way beyond the ERP level, like Construction Dashboards, WIP Management, AR collections, Job & Cash Forecasting, and more.

ADC Anterra
Data
Center

No more waiting 12 hours for a Sage 300 CRE report to run! With Anterra ADC, it takes only minutes to generate reports.

ADC provides a SQL database that mirrors your Sage 300 CRE data, enabling faster and more efficient reporting using tools like Crystal Reports, Power BI, or any SQL-compatible software.

Customize your reports and gain rapid insights to drive better decision-making.

ABI Anterra
Business
Intelligence

AnterraBI (ABI) offers a robust business intelligence solution tailored specifically for the construction industry.

ABI enhances your Sage 300 CRE with pre-built dashboards, customizable reports, and secure, drillable data down to the transactional level—all in a cloud environment.

With ABI, you get up and running quickly, leveraging pre-configured workflows without the expense of maintaining your own reporting infrastructure.
